

Week-01 Day-03 Field Manual v2.0

Date: June 3, 2026

Study Window: 7:00 PM – 8:00 PM

Theme: Git Fundamentals and Repository Workflow

Status: Locked Baseline Version

Governance Reminders

- Root Directory: C:\Projects\Engineering-Reboot-2026
- Notes and journals remain under the Notes folder.
- Maintain consistency with previously agreed directory structures.
- Focus on execution over framework changes.

Mission Objective

Today's objective is to learn the fundamental Git workflow used by software engineers daily.

By the end of the session you should understand:

- Working Directory
- Staging Area
- Commits
- Repository History
- Repository Status Inspection

Expected Deliverables

01-Week-01

■■■ Notes

■ ■■■ Day-03-Git-Workflow-Notes.md

■ ■■■ Day-03-Journal.md

■

■■■ Evidence

■ ■■■ Day-03-Git-Status.png

■ ■■■ Day-03-Commit-History.png

■ ■■■ Day-03-Repository-View.png

7:00 PM – 7:05 PM Startup Procedure

Open VS Code, PowerShell, and File Explorer.

```
cd C:\Projects\Engineering-Reboot-2026
```

```
git --version
```

7:05 PM – 7:15 PM Repository Inspection

```
git status
```

Document:

- Current branch
- Working tree status
- Uncommitted changes

Capture screenshot: Day-03-Git-Status.png

7:15 PM – 7:25 PM Create Repository Content

Create or update README.md.

```
# Engineering Reboot 2026
```

A structured 26-week engineering reboot program.

```
## Goals
```

- Rebuild software engineering skills
- Develop modern development workflow
- Build portfolio projects
- Establish engineering discipline

7:25 PM – 7:35 PM Staging Changes

```
git add README.md
```

```
git status
```

Observe the transition from Working Directory to Staging Area.

Working Directory

↓

```
git add
```

↓

Staging Area

↓

```
git commit
```

↓

Repository History

7:35 PM – 7:45 PM Create Commit

```
git commit -m "Add Engineering Reboot README updates"
```

```
git log --oneline
```

Capture screenshot: Day-03-Commit-History.png

7:45 PM – 7:55 PM Repository Exploration

```
git log
```

```
git status
```

Review commit hash, author, date, and message.

Capture screenshot: Day-03-Repository-View.png

7:55 PM – 8:00 PM Daily Journal

Day 03 Journal

What I Learned

- 1.
- 2.
- 3.

Commands Practiced

- git status
- git add
- git commit
- git log

Challenges Encountered

-

How I Resolved Them

-

Confidence Level

- ☐ Low
- ☐ Medium
- ☐ High

Time Invested

60 minutes

Day Complete

☐

End-of-Day Success Criteria

- Notes file created
- Journal file created
- Three screenshots captured
- git status understood
- git add understood
- git commit understood
- git log understood
- Clean working tree achieved
- One new commit created
- Full study hour completed

Day-03 Outcome

You move from having Git installed to actively using the core workflow used by professional software engineers. Day 04 will build upon this foundation with branches and change isolation concepts.
