

Engineering Reboot 2026

Field Manual Standard

Version 2.0

Week 4 Baseline

Document Status

Document Type: Field Manual Standard

Classification: Publication Standard

Version: 2.0

Release Type: Baseline Revision

Status: Approved and Locked

Supersedes: Engineering-Reboot-Field-Manual-Standard-v1.0

Authority: Week 4 Process Design Review

Purpose

This document defines the standard structure, content requirements, and publication conventions for Engineering Reboot 2026 daily field manuals beginning with Week 4. The objective of this release is to reduce document verbosity, eliminate duplication, improve execution efficiency, and maintain implementation and validation rigor.

Revision Summary

- Condensed Mission Brief.
- Condensed Deliverables Section.
- Condensed Evidence Checklist.
- Condensed Source Control Section.
- Removed Completion Procedure.
- Removed Validation Guidance.
- Removed Routine Project Setup Instructions.
- Removed Governance-Controlled Standards from Daily Manuals.
- Established Week 4 Mandatory Structure.
- Established New Technology Setup Exception.

Week 4 Baseline Standard

1. Mission Brief

Topic:

Objective:

Expected Outcome:

2. Concepts

New concepts introduced during the day.

Previously taught concepts shall not be re-explained unless required by the lesson.

3. Exercises

Filename: .py

Objective:

Requirements:

Expected Behavior:

4. Project / Implementation Assignment

Filename: .py

Objective:

Functional Requirements:

Acceptance Criteria:

5. Validation Matrix

- Observable
 - Measurable
 - Binary (Pass/Fail)
 - Program launches successfully
 - Invalid input is rejected
 - Search function returns expected result
- No validation instructions shall be included.

6. Deliverables

Exercises

■ .py

Project

■ .py

Documentation

■ Notes.md

■ Journal.md

7. Evidence Checklist

- Code Evidence
- Output Evidence
- Notes Updated
- Journal Updated

8. Source Control

- Commit completed
- Push completed
- Remote sync verified

9. Preview of Next Topic

Brief preview of the next day's subject matter.

Removed from Week 4+ Field Manuals

- Notes.md templates
- Journal.md templates
- Repository structure explanations
- Directory placement instructions
- Screenshot naming conventions
- Git command examples
- Commit message examples
- Completion procedures
- Validation guidance
- Project setup instructions (except under the New Technology Exception Rule)

New Technology Exception Rule

- Tool
- Framework
- Platform
- Environment
- Workflow

Examples

- Docker
- FastAPI
- OpenAI SDK
- GitHub Actions
- PostgreSQL
- Python Virtual Environments

Week 4 Design Principles

- Today's learning objectives
- Today's implementation requirements
- Today's validation requirements
- Today's deliverables

Governance-controlled standards shall remain within governance and reference documents.

Approval Record

Approval Authority: Week 4 Process Design Review

Review Status: Approved

Document Status: Locked

Effective Beginning: Day 16 and Beyond

Publication Status: Approved for Archival
