

ENGINEERING REBOOT 2026

Week 6 Wall Planner

Theme: A professional engineer is defined not only by the software they build, but by the discipline, workflow, and judgment they apply while building it.

Day	Topic	Exercises	Mini Project	Status	Engineering Review
26	Linux & WSL2	■	■	■	■
27	Bash & Filesystem	■	■	■	■
28	Python & Virtual Environments	■	■	■	■
29	Git & Developer Workflow	■	■	■	■
30	Environment Integration	■	■	■	■

Weekly Milestones

- Linux development environment operational
- Bash navigation proficiency established
- Python virtual environments working
- Cross-platform Git workflow verified
- Week 6 documentation complete
- Engineering review completed

Week 7 Preview: Object-Oriented Programming • Classes • Objects • Encapsulation • Software Design
