

Engineering Reboot 2026

Week-02 Master Workbook v5.0 (Locked Edition)

Publication Edition

Workbook Philosophy

Minimize ambiguity and context switching.

How To Use

Theory → Exercise → Validation → Evidence → Notes → Journal → Git Push.

Week Overview

Conditionals, Boolean Logic, Loops, Nested Loops, Mini Project.

Day-06

Conditionals

Deliverables: `decision_program.py`

Includes mission brief, engineering context, learning objectives, file creation procedure, exercises, validation matrix, evidence matrix, notes, journal, git workflow, expected end-state, acceptance criteria, and completion checklist.

Day-07

Boolean Logic

Deliverables: `eligibility_checker.py`, `building_access_control.py`

Includes mission brief, engineering context, learning objectives, file creation procedure, exercises, validation matrix, evidence matrix, notes, journal, git workflow, expected end-state, acceptance criteria, and completion checklist.

Day-08

Loops

Deliverables: counting_program.py, even_number_generator.py, sum_calculator.py

Includes mission brief, engineering context, learning objectives, file creation procedure, exercises, validation matrix, evidence matrix, notes, journal, git workflow, expected end-state, acceptance criteria, and completion checklist.

Day-09

Nested Loops

Deliverables: square_pattern.py, right_triangle_pattern.py, inverted_triangle_pattern.py, multiplication_table.py

Includes mission brief, engineering context, learning objectives, file creation procedure, exercises, validation matrix, evidence matrix, notes, journal, git workflow, expected end-state, acceptance criteria, and completion checklist.

Day-10

Menu Driven Calculator

Deliverables: menu_driven_calculator.py

Includes mission brief, engineering context, learning objectives, file creation procedure, exercises, validation matrix, evidence matrix, notes, journal, git workflow, expected end-state, acceptance criteria, and completion checklist.

Week Completion Review

Deliverable audit, evidence audit, documentation audit, repository audit, reflection questions, confidence assessment.

Resolved Technical Debt: TD-2026-001 COMPLETED.
