

ENGINEERING REBOOT 2026

Week 03 Master Workbook

Re-Baselined Edition - LOCKED

Week Overview

Theme: Data Structures & Collection Processing

Dates: June 15–19, 2026

Session Time: 7:00 PM – 8:00 PM

Weekly Objective

Learn how software systems store, organize, traverse, and analyze collections of information using Python data structures.

Strategic Position

Week 03 is the first accelerated week following completion of the Foundation Investment Phase and begins curriculum compression toward the six-month roadmap.

Day 11 – Lists and Collections

Deliverables: list_basics.py, shopping_list.py, list_statistics.py

Day 12 – Collection Traversal & Iteration

Deliverables: iterate_names.py, number_list.py, grade_report.py

Day 13 – Dictionaries & Structured Data

Deliverables: dictionary_basics.py, student_record.py, inventory_dictionary.py

Day 14 – Collection Processing & Analysis

Deliverables: sales_report.py, score_processor.py, temperature_analysis.py

Day 15 – Personal Data Analyzer

Deliverable: personal_data_analyzer.py

Weekly Evidence Requirements

Code screenshots, output screenshots, and Git-Operations.png showing add, commit, push, fetch, status, and branch verification.

Week 03 Success Criteria

All deliverables completed, evidence captured, notes and journals maintained, repository synchronized, and Personal Data Analyzer completed.

Week 04 Preview

Files, Modules & Persistence: file reading, file writing, CSV, JSON, modules, and code reuse.
