

SOFTWARE ENGINEERING REBOOT 2026

WEEK 03 WALL PLANNER – RE-BASELINED EDITION

Week 03 | June 15–19, 2026 | 7:00 PM – 8:00 PM

Weekly Objective

Learn how software systems organize, store, process, and analyze collections of information using Python data structures.

Monday – Day 11

Lists and Collections. Deliverables: list_basics.py, shopping_list.py, list_statistics.py.

Tuesday – Day 12

Collection Traversal & Iteration. Deliverables: iterate_names.py, number_list.py, grade_report.py.

Wednesday – Day 13

Dictionaries & Structured Data. Deliverables: dictionary_basics.py, student_record.py, inventory_dictionary.py.

Thursday – Day 14

Collection Processing & Analysis. Deliverables: sales_report.py, score_processor.py, temperature_analysis.py.

Friday – Day 15

Mini Project – Personal Data Analyzer. Deliverable: personal_data_analyzer.py.

Weekly Targets

Lists, Iteration, Dictionaries, Data Analysis, Personal Data Analyzer, Notes, Journals, Git Discipline.

Week 03 Success Definition

Confident use of lists and dictionaries, collection processing, and completion of a data-processing mini project.
