

ENGINEERING REBOOT 2026
FIELD MANUAL PUBLICATION STANDARD
Version 1.0
Status: LOCKED

1. PURPOSE

Define the required structure, presentation, and readability standards for all Engineering Reboot Field Manuals. The objective is to minimize execution friction, reduce context switching, and maximize productive learning time.

2. DESIGN PHILOSOPHY

Field Manuals are operational documents similar to engineering work instructions, commissioning procedures, manufacturing instructions, and field service guides. Required information must appear at the point of execution.

3. TWO-ARTIFACT MODEL

Artifact A: Working Manuscript (review and approval)

Artifact B: Publication PDF (daily execution)

Publication PDFs shall always be generated from approved manuscripts.

4. READABILITY REQUIREMENTS

- Generous whitespace
- Clear phase separation
- Large phase headings
- Easy checklist marking
- Clear evidence requirements
- No dense text blocks
- Preserve line breaks

5. PHASE STRUCTURE STANDARD

Every exercise phase shall contain:

- Phase Title
- Filename
- Implement Section
- Validation Matrix
- Evidence Checkpoint
- Checkpoint

6. CONTEXT SWITCHING RULE

Information required to execute a task shall be located inside the task itself. The operator should not need to search previous pages or refer back to deliverable inventories.

7. VALIDATION STANDARD

Every coding exercise shall contain an explicit Validation Matrix specifying expected behavior, expected output, and required test cases.

8. EVIDENCE STANDARD

Every exercise shall contain an Evidence Checkpoint identifying required screenshots and artifacts.

9. GIT OPERATIONS SECTION

Every Field Manual shall contain a dedicated Git Operations phase including expected end state, required evidence, and synchronization verification.

10. NOTES AND JOURNAL STANDARD

Every Field Manual shall contain Notes and Journal phases with required filenames, locations, headings, and reflection topics.

11. END-OF-DAY SUCCESS CRITERIA

Every Field Manual shall conclude with an End-of-Day Success Criteria checklist.

12. NEXT-DAY PREVIEW

Every Field Manual shall conclude with a Next-Day Preview section identifying:

- Next topic

- Expected deliverables

- Core concepts

The approved preview becomes the authoritative starting point for the next day's Field Manual.

13. CHANGE CONTROL

Minor formatting refinements may be incorporated into future publications. Structural changes require review and approval. Curriculum changes must be reflected in workbooks and planning documents.

END OF STANDARD

Field Manual Publication Standard v1.0

Status: LOCKED
